**Subject:** Appreciation of Surflite/Buoyweather, Inc. support to SQAA, Inc. on NASA Contract - NNL09AA00C CLIN 1 for Emergency Operations Center Support at NASA Langley Research Center in Hampton, Virginia during Hurricane Sandy

We really appreciate the high quality support and data you and your team were able to provide. The information you provided allowed us to effectively brief our NASA customers. We also appreciate your ability to meet a very aggressive time schedule for submitting contract deliverables.

By having accurate forecast information and timeline with a clear and concise description of the conditions expected, we were able to complete several key high voltage electrical upgrades and maintain normal research operations for much of the weekend prior to the arrival of hazardous weather conditions.

We will be presenting your post weather event forecast analysis at one of our upcoming contract business reviews to demonstrate to our NASA customer the high level of support provided by Surflite/Buoyweather. Also, we will be happy to be a reference of past performance for any government or industry contracts you are pursuing.

Thank again,

Carter Ficklen III, CIH, CSP  
Program Manager  
Safety and Quality Assurance Alliance, Inc.
